CAREER OBJECTIVE

Aspiring software developer with a solid foundation in computer science, skilled in full-stack development. Passionate about solving real-world problems through innovative and efficient solutions. Eager to join a collaborative team where I can continuously learn, grow, and contribute meaningfully to impactful projects and organizational success.

EDUCATION QUALIFICATION

- **Bachelor of Engineering – Information Science & Engineering**
CMR Institute of Technology, Bengaluru
CGPA: 6.66 (2022 – 2026)
- **12th Grade – Science (PCM)**
Springdale College, Pilibhit
Percentage: 69.2% (2020 – 2021)
- **10th Grade – (CBSE)**
St. Aloysius College, Pilibhit
Percentage: 66.83% (2018 – 2019)

TECHNICAL SKILLS

- **Languages:** Python, Java, C
- **Web Technologies:** HTML, CSS, JavaScript, Node.js
- **Frameworks:** ReactJS, Django
- **Databases:** MySQL, MongoDB
- **Software:** VS Code, PyCharm, Jupyter Notebook, Google Colab, Power BI, Tableau
- **CS Fundamentals:** Data Structures and Algorithms, OOP, DBMS, Computer Networks, Operating Systems

PROJECTS

- **Publication Summary Generator – Automated Faculty Profile Builder**
 - **Project Overview:** This tool automates the creation and management of faculty publication profiles by scraping key publication data from Google Scholar.
 - **Data Retrieval:** Scrapes publication metadata (titles, authors, years, citation counts) from Google Scholar using BeautifulSoup, Selenium and Scholarly.
 - **Filtering & Export:** Provides filters by year, author, and citation index; exports reports to Excel or CSV using Pandas and OpenPyXL.
 - **User Management:** Implements secure login, role-based access, and a dashboard for faculty and administrators via Django's authentication system.
 - **Frontend:** Delivers a responsive UI built on Bootstrap, HTML, CSS and JavaScript.
 - **Technologies:** Python, Django, SQLite/PostgreSQL, Selenium, Scopus API, Pandas, Matplotlib, Bootstrap, HTML/CSS/JS.
- **AI Resume Analyzer and Job Fit Scorer**
 - **Project Overview:** A web-based tool designed to evaluate how well candidate resumes match job descriptions, streamlining the hiring process for recruiters and applicants.
 - **Document Parsing:** Extracts crucial details such as skills, experience, education, and certifications from uploaded resumes using Python libraries.
 - **Match Scoring:** Utilizes natural language processing techniques to calculate a compatibility score and identifies mismatches like missing skills or experience gaps.
 - **User Interface:** Delivers a responsive frontend for real-time uploads and displays ranked results for easy candidate comparison.
 - **User Management:** Implements a secure login system with role-based access for HR/admins and candidates, supporting downloadable match reports.
 - **Technologies:** Python, Flask, SQLite, scikit-learn, spaCy/NLTK, Pandas, docx2txt, PyPDF2, HTML, CSS, JavaScript

- **Medi Scope – AI-Powered Doctor Recommendation & Appointment Booking System**

- **Project Overview:** A full-stack application that predicts diseases based on user symptoms and recommends relevant doctors, facilitating easy appointment bookings.
- **Role-Based Dashboards:** Provides secure, JWT-authenticated dashboards for Patients, Doctors, and Admins with controlled access.
- **AI/ML Integration:** Incorporates a machine learning module to enhance the accuracy of disease predictions using symptom analysis.
- **Appointment Management:** Supports real-time appointment scheduling, rescheduling, cancellations, status updates, and patient feedback.
- **Admin Tools:** Features comprehensive management of users and doctors, analytics, and search capabilities based on doctor specialization and location.
- **Technologies:** Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Python (ML module), Vercel

CO-CURRICULAR ACTIVITIES

- **Internship and Hackathons**

- **Project Intern – IIIT Bangalore COMET Foundation** | Working on 5G/6G Wireless Communication research projects | Gaining hands-on exposure to next-generation wireless technologies.
- Participated in ML Fiesta (by IIIT, Bangalore) – presented ML project and received judge appreciation.
- Participated in ML MATRIX (IEEE Computer Society) – focused on healthcare innovations, developing AI/ML solutions aimed at improving medical outcomes and assistive technologies.
- Participated in AEROHACK Hackathon (2025) - after clearing a technical assessment, and implemented an efficient, state-predictive algorithm to solve the 3x3 Rubik's Cube as per the main problem statement.

- **Clubs & Creative Activities**

- Member of IRIS Photography Club – Covered official campus events and exhibitions.
- Participated in intra-college photography contests and visual storytelling campaigns.

- **Courses & Certifications**

- Completed in Python for Data Science under Wipro Talent Next, an industry-recognized program focused on building job-ready skills aligned with modern tech roles.
- Gained practical experience in data analysis, machine learning model building, and web development through hands-on projects and real-world case studies.
- Completed online certifications in Artificial Intelligence, Machine Learning, Python for Data Science, and Frontend Development from platforms like Coursera, Udemy.

ACHIEVEMENTS

- **Secured 13th rank among 200+ entries** in the Intercollege I-Solve Hackathon by developing an adaptive traffic signal system that optimizes lane flow and reduces congestion, demonstrating strong problem-solving and teamwork skills.

PERSONAL DETAILS

Date of Birth	: 10 th June 2005
Gender	: Male
Nationality	: Indian
Linguistic Competency	: English, Hindi
Hobbies	: Photography, Swimming and Reading tech blogs
